Annual Index—Volume 23, 1990

Article Index

February 1990

Articles

Crack detection in silicon nitride by acoustic microscopy
C.W. Lawrence, C.B. Scruby, G.A.D. Briggs and A. Dunhill 3

The quantitative relations between true and standard depth of penetration for air-cored probe coils in eddy current testing
Z. Mottl 11

Evaluation of ultrasonic measurements in forgings
D. Heinrich, H.-J. Meyer and W. Prestel 19

Inversion of Abel's integral equation and its application to NDT by X-ray radiography
M. Deutsch, A. Notea and D. Pal 32

NDT Abstracts

Acoustic microscopy 39

April 1990

Articles

Quantitative vibration mode analysis of mortar and concrete blocks containing flaws
Y.H. Kim, S. Lee and H.C. Kim 67

Detection of defects in wove composites by applying the Wigner distribution to radioscopic images obtained with a linear solid-state array
Y.M. Zhu, G. Peix and D. Babot 75

Review of magnetic methods for nondestructive evaluation (Part 2)
D.C. Jiles 83

Measuring the mechanical properties of cast irons by NDT methods
J. Čech 93

Influence of different forging processes on the ultrasonic response in titanium alloys TC6 and TC11
J.H. Pan, S.B. Shong and J.W. Li 103

Limitations on the strain tensor determination by neutron diffraction using a position-sensitive detector
T. Lorentzen and J. Christoffersen 107

NDT Abstracts

Concrete 110

June 1990

Articles

Automatic recognition of welding defects in real-time radiography
A. Gayer, A. Saya and A. Shiloh 131

Computerized laminagraphy
Y. Segal and B. Cohen 137

Compact disc quality control using digital image processing
L. Losner and A.S. Voloshin 147

A contribution to the testing and classification of industrial radiographic films
P. Ciorau 152

The inspection of solder joints on printed circuit boards by phase-shift holographic interferometry
Y.G. Lu, L.Z. Jiang, L.X. Zou, W.Z. Geng and J. Hong 157

The influence of geometric factors on crack depth measurement using the potential drop technique
J. Gu and L.Y. Yu 161

NDT Abstracts

Image processing 165

August 1990

Articles

On-line weld pool monitoring and defect detection using ultrasonics
I.J. Stares, C. Duffill, J.A. Ogilvy and C.B. Scruby 195

Eddy current examination of steel wires
R. Grimberg, I. Olteanu, T. Cristea, M. Goia, D. Grădinariu, R. Plăvănescu, T. Băcanu, A. Andreescu and D. Apăvăloaie 201

The detection of delaminations using flexural waves
P. Cawley 207

A quantitative comparison between linear X-ray sensitive array and image-intensifier systems
Y.M. Zhu, D. Babot and G. Peix 214

Ultrasonic determination of grain size variations around weldments
M.J. Crook and G.R. Jordan 221

NDT Abstracts

Ultrasonic testing of composites 228

October 1990

Articles

Region-of-interest (ROI) mode in industrial X-ray computed tomography
P. Reimers, A. Kettschau and J. Goebbels 255

High frequency, high temperature ultrasonic transducers
N.D. Patel and P.S. Nicholson 262

Dual vacuum stressing technique for holographic nondestructive testing of honeycomb sandwich panels
M.V. Rao, R. Samuel and K. Ramesh 267

The application of uniform field theory to horizontal axis eddy current coils
R. Clark 271

Numerical calculation of the shift of probe index of ultrasonic angle probes
H. Fukuhara and T. Saito 276

NDT Abstracts

X-ray tomography 283

December 1990

Articles

Guide to designs of IIW-type blocks
F.H.C. Hotchkiss 319

Image-centred frame of reference in rotational film-based X-ray tomography
A. Lindegaard-Andersen, A. Notea, Y. Bushlin and J. Rheinlander 332

Intelligent sensing for non-destructive testing using eddy currents
J. Mercklé, D. Sauter, J. Ragot, J.-B. Lajournade and J.-M. Watrinet 335

Critical comments on the use of X-rays and Ir-192 for detecting linear discontinuities
P. Ciorau 345

Determination of biaxial and triaxial stress distributions using ultrasonics
T. Lüthi 351

NDT Abstracts

Eddy currents 357

Subject Index

Abel's integral equation 32
Acoustic microscopy 3
Aluminium nitride 262
Angle probes 276
Automatic inspection 131
Average silver grain size 152

Calibration 276, 319
Cast irons 93
Coercive force 93
Coil dimensions 11
Compact disc 147
Component integrity 19
Composites 207
Concrete 67
Coplanar rotational laminagraphy 137
Crack depth 161
Crack detectability 3, 152, 345

Debond detection 267
Deconvolution 137
Defect detection 147
Defect standards 201
Defects 75, 83
Delaminations 207
Dual vacuum stressing technique 267

Eddy current coils 271
Eddy current control 201
Eddy current inspection 83
Eddy currents 11, 335
Elastic constants 351
Equivalent penetrameter sensitivity 152

Failure detection 335
Film classes 152
Finite element method 161
Flaw detection 67
Flaws 19, 83, 201
Flexural waves 207
Forging 103
Forgings 19
Fracture mechanics 19

Gamma rays 345
Geometric factors 161
Grain size 221
